Global Scale of English

Fast-track your young students' progress

The Global Scale of English (GSE) is the most precise framework for measuring and developing English proficiency - the central pillar of Pearson English Journey. Based on extensive global research, the GSE goes beyond traditional systems offering unparalleled insights into reading, writing, listening and speaking skills.

With its simple 10-90 scale and detailed learning objectives it extends the Common European Framework of Reference (CEFR), providing learners with a clear, personalized pathway to success boosting their confidence every step of the way.

With the GSE, pre-primary, primary, secondary and adult students can pinpoint proficiency in all of the four key language skills: speaking, listening, reading and writing. Teachers can then set personalized goals for every student, guiding their next steps and accurately measuring their progress along the way.

It's the first of its kind. A truly global standard in English language learning.

Find out more about the GSE, get helpful resources and access the free teacher toolkit at pearson.com/languages.
